If someone wanted to build a website, they might hire a front-end developer to create the site's layout. The front-end developer determines where to place images, what the navigation should look like, and how to present the site. Much of their work involves ensuring the appearance and layout of the site or application is easy to navigate and intuitive for the user.

WORK HISTORY:

2022-PRESENT   BAJAJ FINSERV LTD

ACHIVMENTS

1.EKYC-NRI:

This project are use for like simple ekyc.Who want to invest money in Bajaj,but they live in out of country.If NRI projects use for them.And there documents verification.

2.TELECALLER:

Basically the projects use for that, When any person Register on Ekyc ,after some days they want to delete their details and change some information. Then Only fetching the client number and delete all details or they can modify the details.

3.OMS (order management system):

Basically use of this projects, When Ekyc form submitted after that OMS check the all documents are perfect or not.If documents are not verify then OMS can Reject the Ekyc with cause.

4.BFSL TRADING PORTAL:

It's a huge project and every part of projects are logical and strong JS concept. I Learn too many things from that projects and gain knowledge how to work trading software. How to buy the shear and too many things.

EDUCATION (2017-2021):

B-Tech (electronics and telecommunication engineering)

SKILLS:

1.HTML 2.CSS 3.REACTJS 4.JS

LANGUAGE:

1.ENGLISH 2. HINDI 3. BEGALI

HOBBIES: I LIKE TO PLAY CRICKET AND BADMINTON
